## Spanish Language Website

Gain an edge over your competition with a website in English and Spanish. Since 2009 our creative team has delivered hundreds of English, Spanish websites. From our experience and the years of research on the Hispanic community, we have learned what works, and what doesn't. Creating a website in Spanish goes way beyond just translating content, in order to connect with the Hispanic audience on a cultural and emotional level, advertisers need to understand and be personally engaged with the community.

### In-house native Spanish speakers specialized on SEO

Connecting with the Hispanic audience on a cultural and emotional level requires of advertisers to understand and be personally engaged with the community, that's why we work with SEOs who are native Spanish speakers and expert copy-writers.

### **I already have a website and it includes several pages in Spanish, do I need a new website completely in Spanish?**

If your existing website's primary language is in English then Google and other search engines will rank your website in the English search results. But when a prospect client is searching in Spanish, Google will rank higher websites which primary language is Spanish.

In addition to the benefit in ranking for Spanish language search queries, when a Hispanic person visits your website's homepage, he or she is more likely to convert into a paying client when he sees that you have more than just your standard English website, that you have a website that is designed to resonate with the Latino culture, that proves that you care about working with Latinos.
